

**Better Buildings . . . by Arc-Rib**

**Arc-Rib**  
**Buildings, Inc.**

West Palm Beach, Fla.

# Arc-Rib Buildings

## FOR LIFE TIME SERVICE

### 4 IMPORTANT POINTS

1

All aluminum exterior—non-corrosive—no painting—no maintenance—no absorption of hot sun rays. Aluminum cover reflects sun's rays, keeping building cool.

2

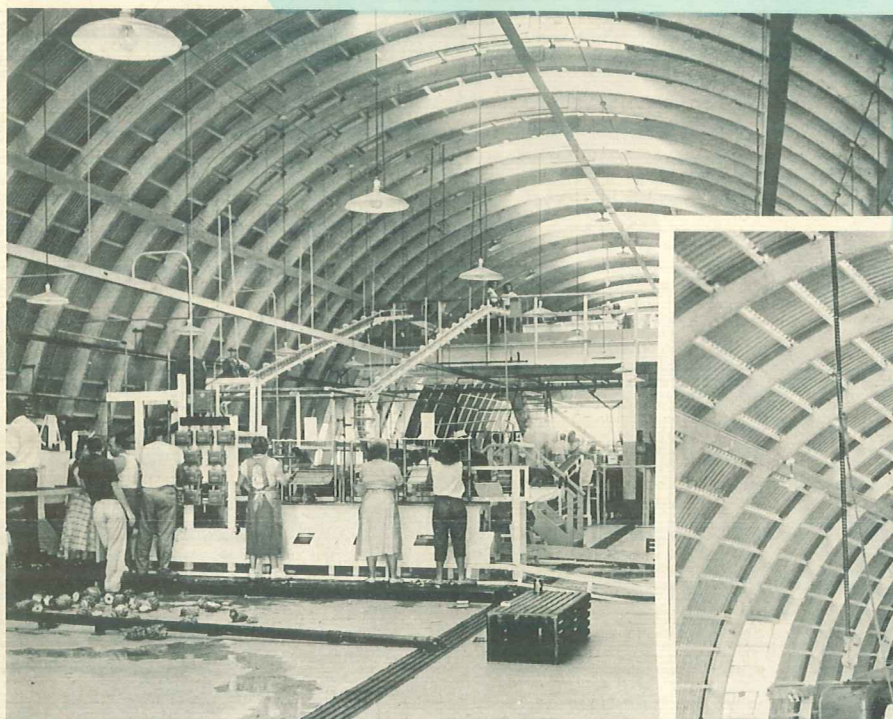

Clear span floor area. All space usable—no obstructions—no posts, beams, trusses, bracings. Clear open space, wall to wall and floor to roof.

3

Corrugated heavy gauge aluminum cover reduces fire hazards greatly. Laminated aluminum painted wooden ribs withstand intense heat safely without burning.

4

Designed and tested to withstand hurricanes. (No Arc-Rib building has ever been blown apart or down by any hurricane.)

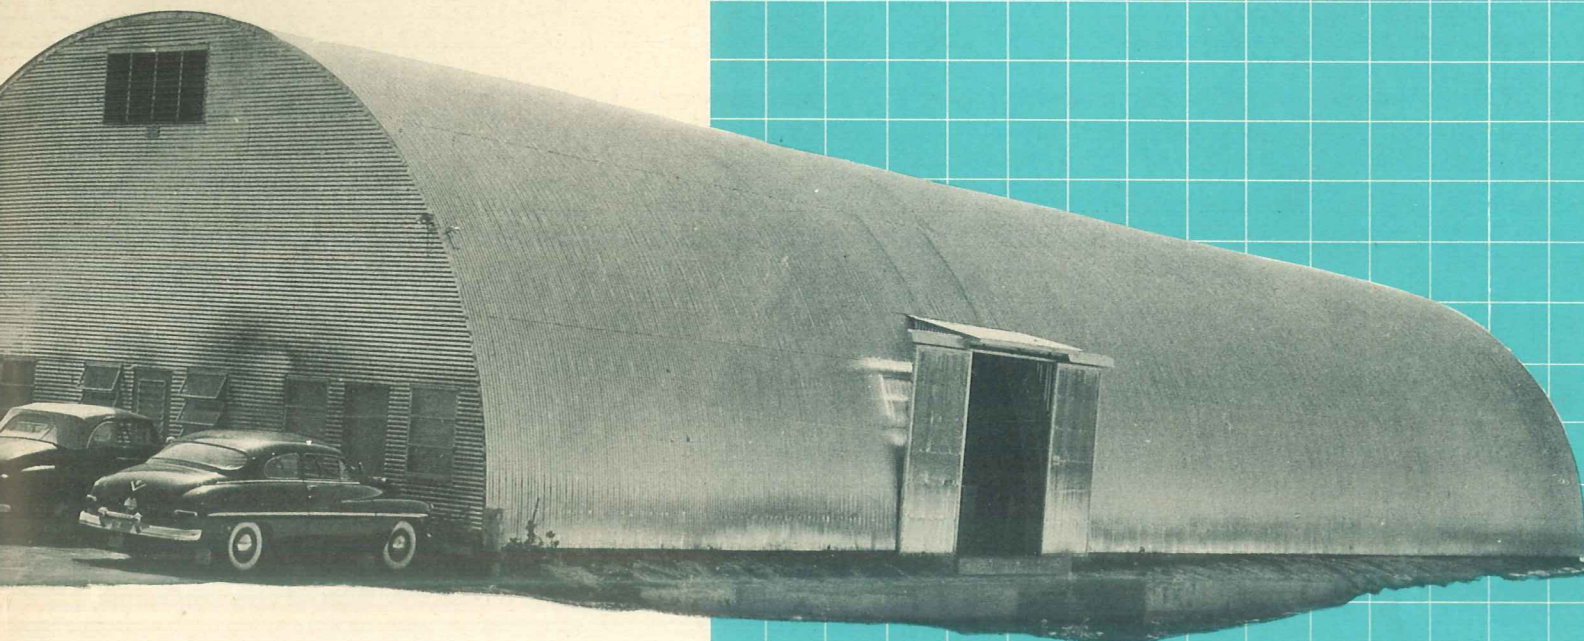

Mullins Lumber Company, pineapple canning plant showing one end of their Arc-Rib building. Note ample daylighting secured through translucent sky panels.

Worth Chemical & Paint Company, showing interior of their Arc-Rib 40 used for light manufacturing. An enduring, compact building of exceptional strength and sturdiness.

American Chlorophyll Company. Three Arc-Rib 20 buildings recently erected for them supply storage facilities for this firm's southern Florida requirements.

Florida Chemical Industries. Arc-Rib 50 with all aluminum cover. Lots of natural daylight, cool and well able to withstand safely heavy hurricane winds.

# SIMPLE CONSTRUCTION WITH ARCHITECTURAL BEAUTY

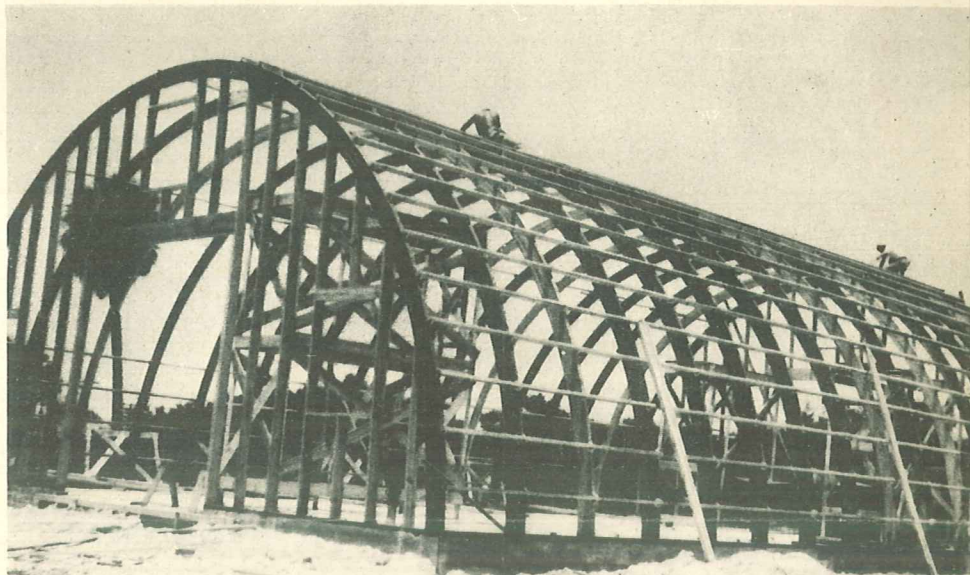

PICTURE BELOW GIVES SKELETON VIEW OF AN ARC-RIB BUILDING

## ● SAVE TIME, MATERIAL AND LABOR

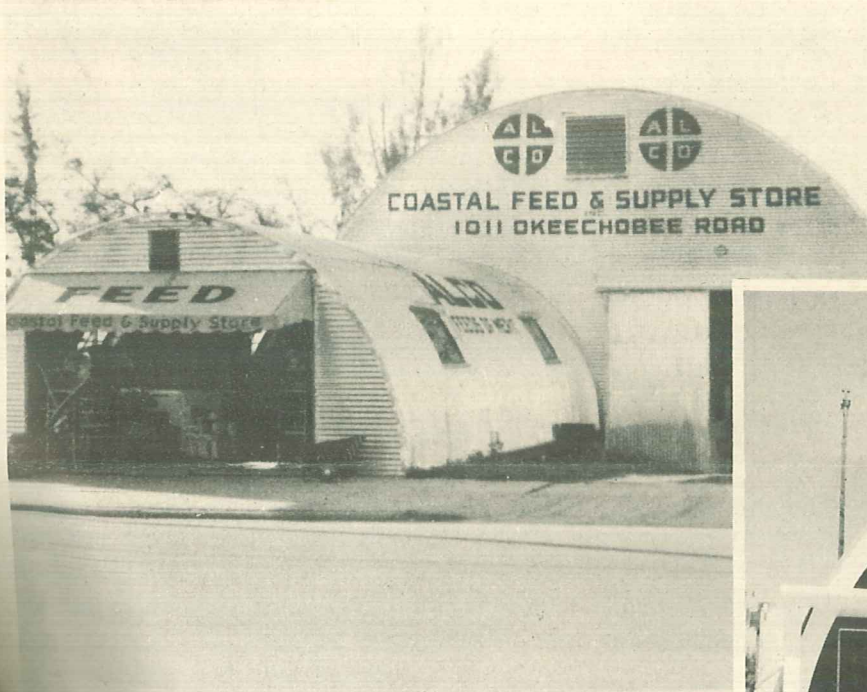

Arc-Rib buildings are substantially bolted directly to the foundation. They come from the factory fabricated accurately and are quickly and easily erected. These factors save much time, material and labor.

## ● LOW-COST CONSTRUCTION

Arc-Rib buildings are today meeting the demands for a low-cost building. This type of building provides unobstructed floor space, free of posts and bracing with ample head room and is the solution to your building problem. Arc-Rib buildings are the modern barns, sheds, and warehouses, being erected everywhere. Buy an ARC-RIB!

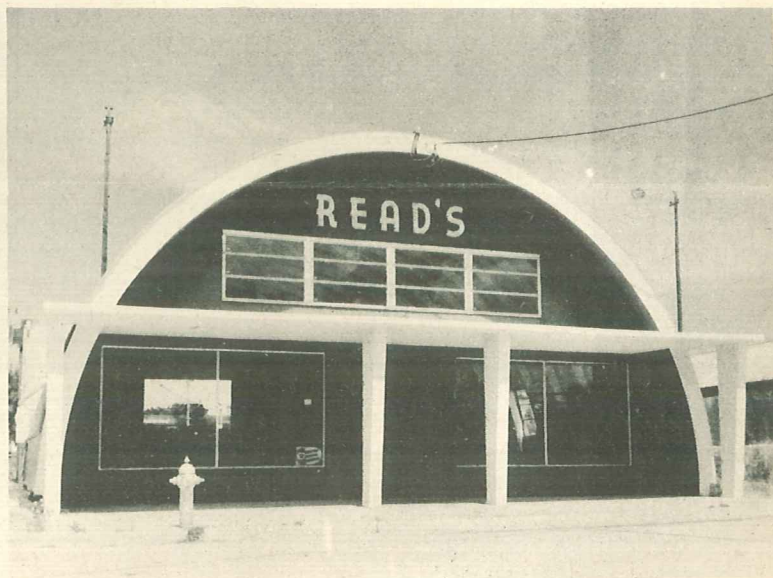

VARIOUS SIZE UNITS MAY BE COMBINED TO SUIT YOUR PARTICULAR NEED

**ARC-RIB BUILDINGS** have a pre-formed heavy gauge aluminum or galvanized metal covering specially machine-shaped to fit the curved sides of the building. Outside edges of metal are crimped for a close, snug fit and inside edge has a standing seam to make sheets weather tight.

Metal sheets are securely fastened with special aluminum nails and sealed with neoprene washers. When desired other coverings for Arc-Rib buildings are readily adaptable, wood sheathing, composition roofing, etc.

FLEXIBLE IN DESIGN TO PROVIDE WIDTHS FROM 8 FOOT  
TO 100 FOOT CLEAR SPAN - ANY LENGTH DESIRED
